

SMART MINING SOLUTION

Utilising cloud computing and the internet-of-things (IoT), Sens Mining gives mining operations a toolkit that enables an interactive visibility.

This results in enhanced profitability by:

- Reducing production costs
- Optimising efficiencies and output
- Improving your Health & Safety environment by reducing risks

These objectives are driven by a real-time dashboard utilising actual and tangible information.

DATA OVERVIEW

Visualises interconnected factors of production in various mining processes and elements.

This data includes:

- Production and cost tracking
- Safety considerations
- Resource utilisation

REAL-TIME INSIGHT

Make impactful changes based on tangible information, resulting in enhancing effectiveness and profitability.

Key Performance Indicators (KPI) are reported in a planned vs. performed methodology.

ACCURACY

ACHIEVED OUTPUT

HRS WORKED

INTERPRETATION ANALYTICS

Processes mining activity into inter-connected intelligence. This allows users to interpret, analyse and translate information gathered into actionable real-time insights.

SMART MINING SOLUTION

The SENS MINING SOLUTION is the optimal production monitoring tool, leveraging cloud based solutions to give operational and management personnel real-time insight and impact on decision-making.
